ABSTRACT

As part of Congress 2023, OTESSA encourages researchers and practitioners to share their scholarship on the complexities that technology and/or open practice raise for education, society, and scholarship, as well as to come together to build connections, collaborations, and critical conversations at this year's conference. Scholars, practitioners, graduate and undergraduate students, librarians, designers, makers, policy advisors, and educators or administrators from K12, post-secondary, or workplace settings are all welcome! Whatever your current role and wherever you are located in the world, we invite you to join us and contribute your experience, expertise, and insights to timely discussions about openness and technology in education, society and scholarship.
